Helpful Notions:

- Prewound bobbins (PB24W)
- Best Press™ Starch Alternative (BP60031)

Helpful Tips:

- Stabilize table runner with spray starch or a starch alternative such as Best Spray™ Starch Alternative.
- Use Fusible No Show Mesh Stabilizer in conjunction with Hydro-Stick™ Tear-Away Stabilizer. First, stabilize one end of table runner with Fusible No Show Mesh Stabilizer. Next, use the Hydro-Stick™ Tear-Away Stabilizer rather than hooping the table runner. Simply hoop the stabilizer and adhere the table runner to the sticky area of the stabilizer. Economize by using stabilizer on a roll. Instead of cutting the stabilizer to the size of the hoop, keep the stabilizer on the roll when you hoop. After embroidering the first section, carefully tear away the fabric from the stabilizer. Give the stabilizer a quick press to smooth out the wrinkles from the first hooping. Then rehoop the next section of stabilizer and continue embroidering.
- All design components are pictured on the following page. Follow the indicated stitching order; start with background designs and work toward foreground designs. Some designs are embroidered over portions of other designs.
- Use the colors specified on the color chart included on the CD.
